

Are there gaps in your sterile compounding practices?

Get a comprehensive risk analysis

Let our team of leading experts in medication safety and USP Chapter <797> provide a focused review of your organization's pharmacy compounding processes that will help you implement lifesaving error prevention strategies and better meet practice standards.

The Benefit

Sterile product preparation errors continue to gain national-level attention. An objective, thorough evaluation of your environment and compounding practices can help you develop and implement a robust plan to gain <797> compliance and promote safety.

National Experts

ISMP is a nonprofit organization, and the nation's top resource for independent and effective medication safety recommendations. Clinical IQ, led by Eric S. Kastango, is well-respected for its expertise in sterile compounding and USP Chapter <797> education.

Practice Settings

ISMP's comprehensive sterile compounding consultations can be customized for a variety of settings, including hospitals and health systems, home infusion pharmacies, ambulatory oncology centers, and physician practices.
