

BECAUSE OF ISMP

Medication safety would be very different today without ISMP. Some of our many contributions include:

- First and only national voluntary medication error reporting program (ISMP MERP)
- Newsletters with real-time safety information read and trusted by practitioners in acute, ambulatory, and long term care settings
- Ongoing advocacy with manufacturers to change medication labels/ packaging to avoid fatal medication errors
- Groundbreaking medication safety self assessments for healthcare organizations
- Free guidelines and tools, including lists of high alert drugs, often confused names, and tall man lettering

For an expanded list of ISMP's many important contributions to safety, please visit www.ismp.org/about/timeline.asp.

WE NEED YOUR SUPPORT

We depend on caring individuals and organizations to support our lifesaving work. Your charitable donation to the 2017 Annual Fund will help keep ISMP an important part of the fight against preventable medication errors.
